Thanakrit Jomhong

092-275-1575 | thanakritjomhong@gmail.com | linkedin | github

I am a Computer Engineering student driven by curiosity, mastery, and clarity. I thrive on solving problems, learning deeply, and helping others see what I see. I enjoy connecting ideas across disciplines and turning complexity into structure. My long-term goal is to build meaningful systems that create real world impact.

EDUCATION

Mahidol University — Aug 2024 - May 2028
Bachelor of Engineering Program in Computer Engineering — GPA 3.96

Suksanareewittaya School — May 2021 - Mar 2024
High School, Computer STEM Program — GPA 4.00

English Score
MU-ELT 113/150 (Equivalent to TOEIC 850+)

TECHNICAL SKILLS

Languages & Databases : Python, C, C++, JAVA, SQL, HTML / CSS

Libraries & Frameworks : Pandas, Numpy, Matplotlib, Seaborn, PyTorch, Scikit-learn,
Tools : Git, Github, Supabase, Vercel, Google Colab, VS Code, spreadsheet, MATLAB, n8n, Docker

EXPERIENCE

Head of Sponsorship Coordinator | ClickCamp16, Mahidol Computer Engineering — May 2025 - Dec 2025

- Negotiation & Relationship Management
- Formal Contact over 200+ company, apply data management skills
- Secured [130,000] THB in funding

Piscine 42Bangkok School | 42school, KMITL — May 2024 - Jun 2024

- Completed the one-month selection program at 42
- Trained 70 -100 hours per week, developing autonomy, adaptability, and collaboration skills while building multiple projects under real deadlines.
- Relevant Coursework : UNIX & Shell, Git & Version Control, C Programming

Talent Robotics, AI and Coding (Talent RAC) | AI Track, Sirindhorn Science Home — OCT 2023

- A program by IPST, and NECTEC aimed to develop future talents in robotics, AI, and coding through online and on-site training, and hands-on projects from real-world industry.
- Completed onsite training in AI application, 3D design, and IOT
- Designed and implemented an security check system utilizing sensors and image classification model by kidbrightmicroAI platform

PROJECTS

HR-ChatBot| n8n, Docker, PosrtgresSQL (Supabase), LLM and RAG

- Developed a cross-platform chatbot to automate HR workflows like leave requests and benefit inquiries through the LINE Messaging API
- Integrated LLM to achieve high-accuracy natural language intent extraction

BananaRipnessClassification | Python, PyTorch and scikit-learn

- Developed a Deep Learning image classification model using ResNet34 and Fastai to identify banana varieties and ripeness stages with F1-score of 87.5% on the test set.
- Optimized model performance through transfer learning and learning rate scheduling, significantly reducing manual inspection time for agricultural quality assessment.

Bangkok Public Transportation Passenger Insights | Analysis (Pandas, NumPy, Scipy), Visualization (Plotly, Seaborn, Matplotlib)

- Analyzed 14 months of multi-modal transit data (BTS, MRT, ARL, Red Line Train) to identify passenger growth trends, market share shifts, and service stability
- Developed a Z-Score anomaly detection model to correlate passenger volume fluctuations with 35+ specific Thai holidays and events

EXTRACURRICULAR ACTIVITIES & AWARDS

- Construction of check dams and school facilities, 16th Jitasa Camp, Mahidol Engineering Volunteer Club — Dec 2025
- 2nd Place Winner, Practice AI, Super AI Engineer SS5 (AI INOVATOR TRACK, Western Region) — Summer 2025
- STAFF Group Leader, CTFriends2, Mahidol Engineering Cybersecurity Club — Apr 2025
- STAFF Tickets Seller, INCRISIS Concert, Mahidol Engineering Student Association — Apr 2025
- Participate in Invent for the planet Hackathon, INT Mahidol — Feb 2025
- STAFF Entertainment & Group Leader, ClickCamp15, Mahidol Computer Engineering — Dec 2024
- Gold Medal, Onsite presentation, Data Science Project Contest 2023, CMU — Sep 2023
