PROFILE

I am a Computer Engineering student driven by curiosity, mastery, and clarity. I thrive on solving problems, learning deeply, and helping others see what I see. I enjoy connecting ideas across disciplines and turning complexity into structure. My long-term goal is to build meaningful systems that create real world impact.

EDUCATION

Mahidol University <i>Bachelor of Engineering Program in Computer Engineering</i>	Aug. 2024 – May 2028 GPA 3.96
Suksanareewittaya School <i>High School, Computer STEM Program</i>	May 2021 – Mar. 2024 GPA 4.00
English Score <i>MU-ELT 113/150 (Equivalent to TOEIC 850+)</i>	

TECHNICAL SKILLS

Languages & Databases: Python, C, C++, JAVA, SQL, HTML / CSS
Libraries & Frameworks: Pandas, Numpy, Matplotlib, Seaborn, PyTorch, Scikit-learn
Tools: Git, Github, Supabase, Vercel, Google Colab, VS Code, spreadsheet, MATLAB, n8n, Docker

EXPERIENCE

Head of Sponsorship Coordinator — ClickCamp16, Mahidol Computer Engineering May 2025 – Dec. 2025

- Negotiation & Relationship Management
- Formal Contact over 200+ company, apply data management skills
- Secured [130,000] THB in funding

Piscine 42Bangkok School — 42school, KMITL May 2024 – Jun. 2024

- Completed the one-month selection program at 42
- Trained 70 -100 hours per week, developing autonomy, adaptability, and collaboration skills while building multiple projects under real deadlines.
- Relevant Coursework : UNIX & Shell, Git & Version Control, C Programming

Talent Robotics, AI and Coding (Talent RAC) — AI Track, Sirindhorn Science Home Oct. 2023

- A program by IPST, and NECTEC aimed to develop future talents in robotics, AI, and coding through online and on-site training, and hands-on projects from real-world industry.
- Completed onsite training in AI application, 3D design, and IOT
- Designed and implemented an security check system utilizing sensors and image classification model by kidbrightmicroAI platform

PROJECTS

HR-ChatBot | *n8n, Docker, PosrtgresSQL (Supabase), LLM and RAG*

- Developed a cross-platform chatbot to automate HR workflows like leave requests and benefit inquiries through the LINE Messaging API
- Integrated LLM to achieve high-accuracy natural language intent extraction

BananaRipnessClassification | *Python, PyTorch and scikit-learn*

- Developed a Deep Learning image classification model using ResNet34 and Fastai to identify banana varieties and ripeness stages with F1-score of 87.5% on the test set.
- Optimized model performance through transfer learning and learning rate scheduling, significantly reducing manual inspection time for agricultural quality assessment.

Bangkok Public Transportation Passenger Insights | *Pandas, NumPy, Scipy, Plotly, Seaborn, Matplotlib*

- Analyzed 14 months of multi-modal transit data (BTS, MRT, ARL, Red Line Train) to identify passenger growth trends, market share shifts, and service stability
- Developed a Z-Score anomaly detection model to correlate passenger volume fluctuations with 35+ specific Thai holidays and events

EXTRACURRICULAR ACTIVITIES & AWARDS

16th Jitasa Camp, Mahidol Engineering Volunteer Club	Dec. 2025
2nd Place Winner, Practice AI, Super AI Engineer SS5 (AI INOVATOR TRACK, Western Region)	Summer 2025
STAFF Group Leader, CTFriends2, Mahidol Engineering Cybersecurity Club	Apr. 2025
STAFF Tickets Seller, INCRISIS Concert, Mahidol Engineering Student Association	Apr. 2025
Participate in Invent for the planet Hackathon, INT Mahidol	Feb. 2025
STAFF Entertainment & Group Leader, ClickCamp15, Mahidol Computer Engineering	Dec. 2024
Gold Medal, Onsite presentation, Data Science Project Contest 2023, CMU	Sep. 2023
